Vinicius Marques Chioratto

Senior Software Engineer | Java & Spring Boot | AWS | Distributed Systems

Contact Information

- **Location**: Munich, Germany
- **Email**: viniciusmchioratto@gmail.com
- **Website**: viniciuschioratto.github.io
- **GitHub**: viniciuschioratto
- **LinkedIn**: Vinicius Chioratto
- **Citizenship**: Italian, Brazilian

Professional Summary

Senior Software Engineer with **8+ years of experience** building and evolving scalable software systems, with a strong focus on **backend development using Java and Spring Boot**. Experienced in designing and developing **distributed systems, microservices, RESTful APIs, and event-driven architectures** using technologies such as **Kafka, AWS, Kubernetes, Docker, and Terraform**.

Proven experience working in international environments and collaborating with distributed teams across Europe and the United States. Experienced in **technical leadership**, mentoring developers, driving technical decisions, and delivering complex projects from requirements to production.

Strong background in **software architecture, cloud infrastructure, automated testing, CI/CD, and system modernization**, with experience contributing to large-scale products, financial systems, and integrations with external services.

Skills

Category	Technologies
Languages	Java, TypeScript, JavaScript, Groovy, PHP
Backend	Spring Boot, Spring Framework, Spring Data, Spring Security, Node.js, NestJS, RESTful APIs, Project Reactor
Messaging & Integration	Apache Kafka, AWS SQS, AWS SNS, Event-Driven Systems
Architecture	Microservices, Distributed Systems, Domain-Driven Design (DDD), Hexagonal Architecture, Event-Driven Architecture, SOLID, Design Patterns
Cloud & Infrastructure	AWS, Kubernetes, Docker, Terraform
AWS	Lambda, API Gateway, S3, DynamoDB, SQS, SNS, CloudWatch
Databases & Search	PostgreSQL, MySQL, MongoDB, DynamoDB, Elasticsearch
Testing	JUnit, Mockito, Testcontainers, Jest, Playwright, Cucumber, Integration Testing, End-to-End Testing
Frontend	React, Next.js, Angular
DevOps & Observability	Git, CI/CD, Jenkins, GitHub Actions, GitLab CI, Datadog, Grafana, SonarQube, Renovate

Work Experience

Software Engineer - Flix

- **Period**: 07/2025 - Present
- **Location**: Munich, Germany

- **Responsibilities**:
    - Work within the **Financial Services** stream, developing and evolving backend services supporting financial and fiscal processes across the Flix platform.
    - Develop and maintain integrations with external **tax and fiscal service providers**, enabling the calculation and reporting of tax-related information to government authorities in compliance with local regulations.
    - Design and implement solutions for **invoice generation and delivery**, ensuring accurate and reliable financial documents are issued to customers.
    - Contribute to the **modernization and decoupling of a monolithic platform**, extracting services and improving system modularity, scalability, and maintainability.
    - Design and develop cloud-based backend services using **Java, Spring Boot, AWS, Kafka, Kubernetes, Terraform, and DynamoDB**.
    - Collaborate with cross-functional teams to analyze requirements, design technical solutions, troubleshoot production issues, and ensure the reliability of financial services.
    - Contribute to **automated testing, CI/CD, and engineering best practices** to maintain high standards of software quality and delivery.

Senior Software Engineer - BNP Paribas Personal Finance

- **Period**: 06/2024 - 06/2025
- **Location**: Remote for Madrid, Spain
- **Responsibilities**:
    - Led a team of **4 developers**, providing technical guidance, removing blockers, and ensuring high development and delivery standards.
    - Developed backend services using **Java 17, Spring Boot, PostgreSQL, Elasticsearch, and Kubernetes**, delivering reliable, maintainable, and scalable solutions.
    - Led the **migration of an internal product to modern technologies**, improving maintainability and aligning the platform with current engineering standards.
    - Led the development of an internal library of **reusable Angular components**, improving consistency and development efficiency across the application.
    - Collaborated with stakeholders and cross-functional teams to translate business requirements into technical solutions and deliver production-ready features.

Senior Software Engineer - Trimble Transportation

- **Period**: 04/2020 - 05/2024
- **Location**: Remote for Minnesota, USA
- **Responsibilities**:
    - Led the development of a transportation product (OTA) used by **over 500,000 trucks**, collaborating closely with U.S.-based engineering and product teams.
    - Designed and developed backend services using **Java, Spring Boot, AWS, Kubernetes, Elasticsearch, and MySQL**, while also contributing to React and AngularJS applications.
    - Provided mentorship and technical guidance to junior engineers, supporting their professional growth and improving overall team performance.
    - Partnered with clients and stakeholders to define solution requirements and translate business needs into technical deliverables.
    - Designed, developed, and maintained new features while identifying and resolving production issues to ensure system reliability and availability.
    - Contributed to system architecture, technical design, automated testing, and continuous improvement of development practices.
    - Worked with **Java 8, Java 11, Groovy, Node.js, MySQL, Elasticsearch, Kubernetes, AWS, React, and AngularJS** across the platform.
    - An overview of the product's functionality can be seen in the PACCAR OTA video.

Junior Software Engineer - MKX Websites

- **Period**: 09/2018 - 03/2020
- **Location**: Londrina, Brazil
- **Responsibilities**:
    - Collaborated with cross-functional teams to gather requirements and understand business needs for e-commerce platforms.
    - Troubleshot and resolved bugs and production issues across online shops.
    - Developed features using **PHP, Java, MySQL, Git, HTML, CSS, and JavaScript**.
    - Integrated online shops with multiple **payment providers and marketplaces**, ensuring reliable communication between external services and the platform.

Education

Bachelor of Science | Computer Science

- **University**: State University of Londrina
- **Location**: Londrina, PR - Brazil
- **Dates of Attendance**: 2014 - 2019
